UNWAVERING

Endless Journey

We are curators of a culture of leisure, shaping designs that begin with curiosity and a reverence for the natural world. Each piece invites people to linger, connect, and live beautifully outdoors.

For nearly three decades, a passion for the sea and a commitment to innovation have guided our vision for the future of shade. What we create transcends function, becoming an expression of design, craftsmanship, and imagination.

Designing the future of shade is not just a mission. It is our journey. Join us in this endless pursuit of shade without limits.

Designed for Living.

Born of the Sea

Raised on Florida's coast, Dougan Clarke's design philosophy is anchored in a lifelong connection to the sea and a love for outdoor living. Years of experience with high performance nautical rigging gave him a deep understanding of engineering and performance, which he pairs with a creative vision to craft shade systems that feel effortless and elegant. His approach blends precision and artistry, creating designs that invite you to slow down and savor the moment.

Performance Meets Elegance

Every parasol is built to endure, engineered with marine grade materials and informed by the demands of the open sea. Sculptural frames and meticulously detailed components ensure reliable performance, while refined finishes and silhouettes elevate outdoor spaces into places of comfort and style.

Inspired by Nature

Nature shapes both craft and intent. Our parasols embody the balance of strength and grace found in the natural world, reinterpreting its forms into sculptural shade with purpose. They carry the spirit of exploration, designed to awaken curiosity, invite discovery, and turn any outdoor setting into a place worth lingering.

Endless Possibilities

Each parasol begins as a blank canvas, ready to reflect the vision of the designer and the spirit of the setting. With a thoughtfully curated range of fabrics, trims, finishes, and custom options, our collections can express any mood—from serene living to bold conversation starters. Whether creating an intimate hideaway or shaping the character of a luxury resort, these designs transform outdoor spaces into unforgettable destinations.

CUSTOMIZE

Design Studio

Vision Realized

Seeing is understanding—and the Tuuci Design Studio transforms parasol, cabana, furniture, and accessory specifications into dynamic, client-ready renderings. Designers can explore customizations and enhancements in real time, visually demonstrating every detail to inspire confidence and streamline decision making. Powered by advanced gaming technology, this industry-first visualizer delivers a robust 3D experience that brings ideas vividly to life.

With seamless export capabilities for leading Building Information Modeling (BIM) platforms such as SketchUp and Revit, every selected finish, fabric, and enhancement carries directly into professional design workflows, bridging the gap between imagination and implementation with precision and ease.

CUSTOMIZE

Canopy | Softscapes

Softscapes

Softscapes by Tuuci is a custom collection of prints that bring emotion, narrative, and intention to outdoor design. Offered with the ability to select ink colors, the patterns can be applied to single or double canopies, printed on the top or underside. On a single canopy, the design subtly reveals itself on the reverse side, adding layered beauty to the aesthetic.

Bringing a sense of individuality to every setting, Softscapes invite relaxation, spark connection, and transform outdoor environments into something deeply personal and visually expressive. Softscapes celebrate the beauty of outdoor living.

Brand Brilliance

Across the globe, renowned restaurant groups, luxury resorts, and leading franchises trust Tuuci to deliver shade that reflects their commitment to excellence. Our in-house design team translates brand visions into striking, functional assets, ensuring every installation feels both purposeful and iconic.

Every detail is executed with precision — from printing on the top and underside of the canopy to exact color matching that aligns seamlessly with brand standards. The result is shade that reinforces identity, elevates spaces, and endures season after season.

Your brand is built to last. Its shade should be just as timeless.

Pantone® Matching

Brand colors are precisely matched and flawlessly executed to honor your guidelines and maintain visual consistency.

Pixel Perfect Printing

Our exacting standards ensure logos and graphics are rendered with crisp precision for a professional, lasting impression.

Design Services

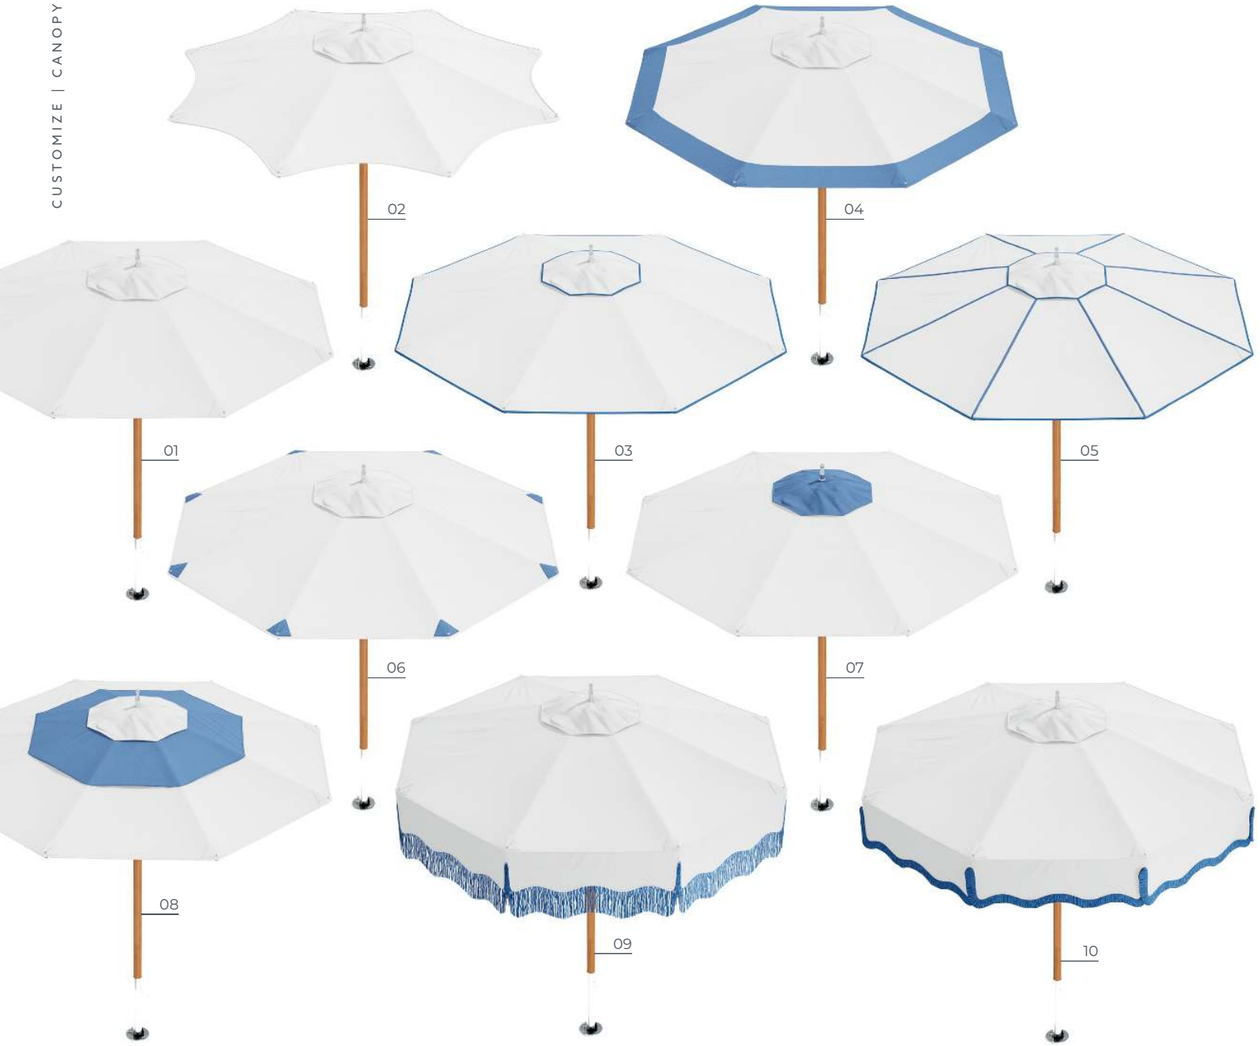

Collaborate with our in-house design team to transform brand visions into beautifully realized shade solutions.

Long-Lasting Color

Specialized dyes and finishing techniques protect against fading, ensuring colors stay vibrant season after season, even in demanding environments.

Custom Details

Shade your way with artfully crafted valances and distinctive accents that bring personality and polish to every project.

From contrasting pockets and binding to cord fringe, double-sided canopies, unique shapes and Softscapes, there are countless ways to tailor a parasol to your vision. Additional enhancements are available to ensure every detail contributes to a signature look that feels as intentional as the space it inhabits.

CUSTOMIZE

COMFORT LIFT

Comfort Lift with Stainless Steel Pin provides added reach and leverage for opening and closing your parasol with comfort.

CUSTOMIZE

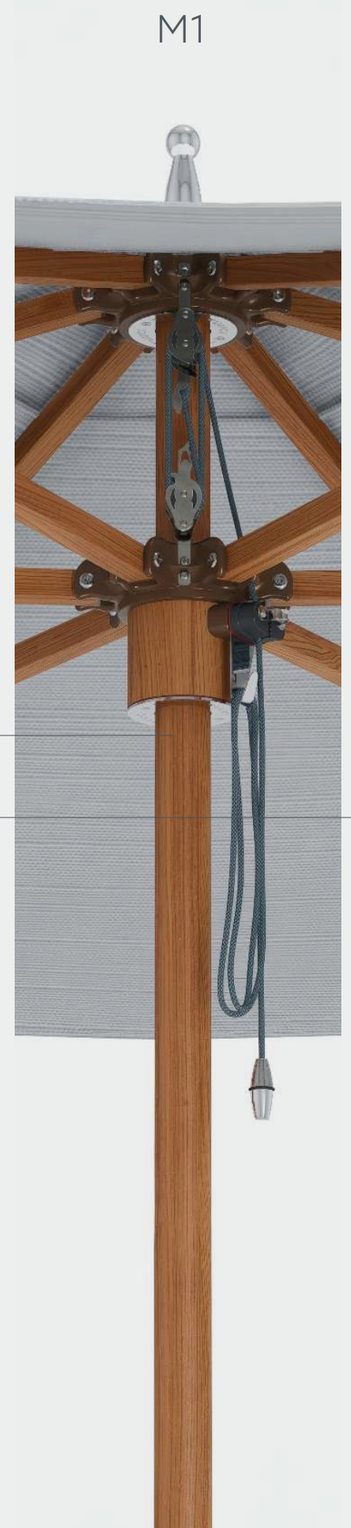

M1 vs M1+

M1
Hub: 3.0″
Mast: 1.5″

The M1 Hub is engineered with a 3″ high-performance, self-lubricating mechanism designed to ensure smooth, low-friction operation over time. This advanced signature hub system minimizes wear while providing consistent rotational performance, and it offers enhanced protection for the 1.5″ marine grade aluminum mast by reducing direct stress and environmental exposure.

M1+
Hub: 3.5″
Mast: 2.0″

The M1+ Hub is built for strength and long-term performance, featuring a robust 3.5″ high-performance signature hub with a self-lubricating design that ensures smooth, low-friction operation even under demanding conditions. Engineered to deliver exceptional stability and structural integrity, the signature hub minimizes mechanical wear and protects the 2.0″ marine grade aluminum mast by absorbing stress and shielding it from environmental exposure. The result is a highly durable system optimized for reliable performance in harsh outdoor environments.

CUSTOMIZE

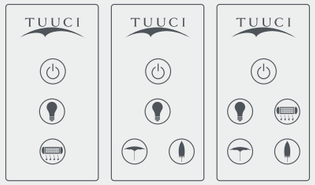

Smart Automation

Tuuci's smart automated shade platforms elevate collapsible shade technology, allowing you to open and close even our largest umbrellas with the effortless push of a button. Seamlessly blending innovation with convenience, our intuitive touchpad interface places complete control at your fingertips. From shading and lighting to heating, every element is designed to respond with precision and ease. Powered by a modular control unit with advanced safety protocols, Tuuci redefines intelligent outdoor comfort—where technology and elegance converge.

Configuration Options

Automation to suit your individual needs. Choose from three pre-set configuration options available for both the Single and Dual MAX Cantilevers.

- Light and Heaters
- Light and Automation
- Light, Heaters and Automation

Ambia LED's upward illumination

Touch-sensitive on-off activation surface.

CUSTOMIZE

Elevated Illumination

Whether extending the day or the season, Tuuci's Ambia LED Light brings the warmth of indoor comfort to the open air. As night falls, the marine, grade LED fixture casts a gentle, ambient glow beneath the parasol—bright enough for reading, yet elegantly subdued to enhance al fresco dining. By day, its thoughtful design remains nearly invisible, with discreetly concealed wiring and a seamlessly integrated fixture. A perfect harmony of innovation and elegance, Ambia LED Light transforms outdoor spaces with effortless sophistication.

Elegant Illumination

Tuuci's innovative Ambia LED Light casts a warm, even glow beneath the umbrella, illuminating the canopy from within for a beautifully balanced ambiance.

Touch Control

The intuitive touch control system allows effortless on-off activation and dimming with a simple touch of the finial beneath the umbrella's signature hub.

UL-approved infrared heaters features emergency shut-down, automatic cool-down, and an intelligent lock-out function.

Intuitive touch light, heaters and automation panel

CUSTOMIZE

Heating

To elevate outdoor comfort and extend the season, the MAX Cantilever and Center Post parasols can be seamlessly outfitted with two or four UL-approved infrared heaters, elegantly integrated into their design.

Marine grade wiring runs discreetly within the frame, while each heater is securely affixed to ensure an even distribution of warmth for those gathered beneath. Thoughtfully engineered for safety and reliability, the system features emergency shut-down, automatic cool-down, and an intelligent lock-out function. With a modular design for effortless maintenance, every detail is crafted for enduring performance and unparalleled comfort.

Extend The Season

The user control panel offers a seamless and intuitive way to tailor the climate beneath the parasol's canopy. Designed for effortless operation, its elegant push-button interface features clear, icon-based controls, allowing for precise adjustments with a simple touch.

Whether enhancing warmth on a cool evening or fine-tuning the ambiance, this sophisticated system ensures comfort is always at your fingertips.

CUSTOMIZE

Tilt

Transform your outdoor space with the refined versatility of the Tuuci Cantilever with tilt functionality. Designed to provide both shade and privacy with effortless grace, it offers seamless 360-degree rotation at its base and unlimited tilt adjustments along the mast, ensuring perfect positioning at any angle.

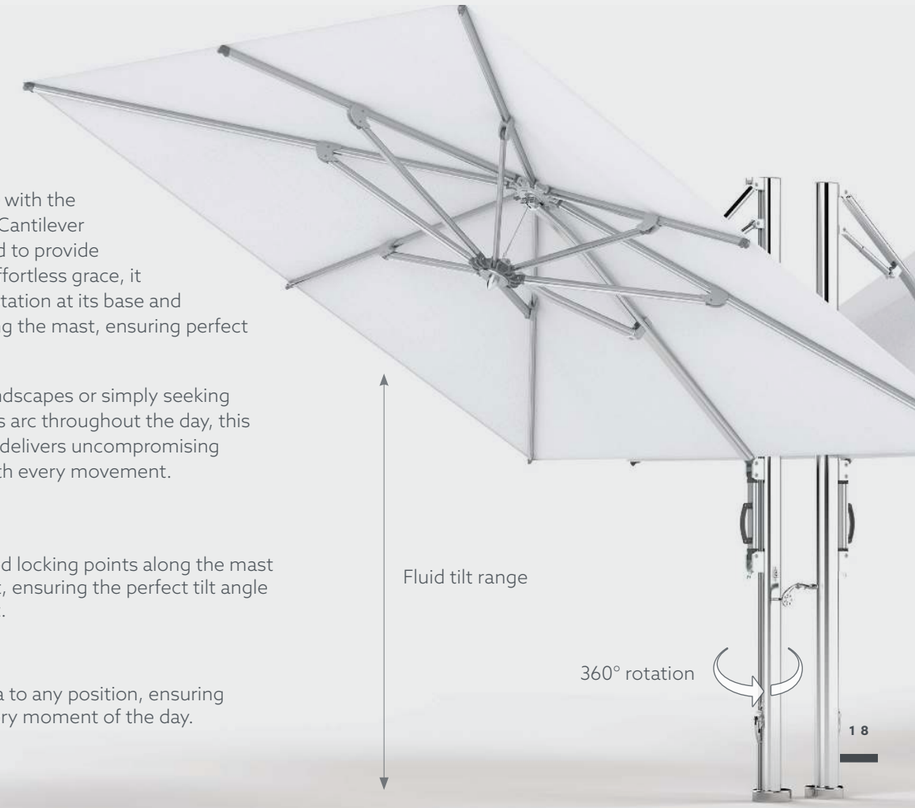

Whether navigating unique landscapes or simply seeking the freedom to follow the sun's arc throughout the day, this elegantly engineered solution delivers uncompromising comfort and sophistication with every movement.

Fluid Tilt Range

A series of precisely engineered locking points along the mast allow for effortless adjustment, ensuring the perfect tilt angle for optimal shade and comfort.

Easy 360° Rotation

Effortlessly rotate the umbrella to any position, ensuring optimal shade coverage at every moment of the day.

The strength, durability and serviceable design allows for an extended usable life reducing the environmental impact of the product.

2. Profound Strength & Reserved Beauty

The MEGA MAX features Tuuci's latest vision signature hub design constructed of marine grade stainless steel which maximizes durability while maintaining a sleek and functional design. The 5.25" mast has a four-channel aluminum mast extrusion that amplifies its strength, creating the ability to withstand the harshest environmental conditions.

1. Personalized Comfort

Optimize your MEGA MAX shade experience with the optional Ambia LED light with up and down lighting featuring independent dimming or our high efficiency infrared radiant heaters to complement the outdoors with indoor comforts.

4. Telescoping Mast & EasyDrive Crank Lift

The MEGA MAX operates with a heavy-duty gearbox and self-lubricating lead screw mechanism for smooth and easy opening and closing with the external hand crank. The telescoping mast feature allows the parasol to gracefully deploy while lifting up to reduce interference with furniture.

3. Support Where You Need It

The ribs of the MEGA MAX feature Tuuci's largest rib diameter yet, with a generous 1.5" diameter featuring built in fluted reinforcement design to support the massive canopy and defend against wind. Every detail was considered to make a longer lasting, more durable shade device.

Featuring the advanced V-MAX™ strut design, reinforced shade skins, and a solid-state operating system, it promises enduring strength and understated beauty for years to come.

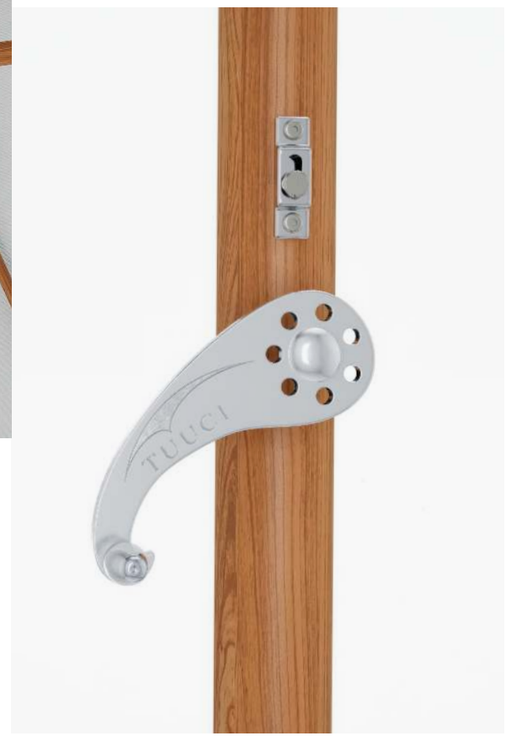

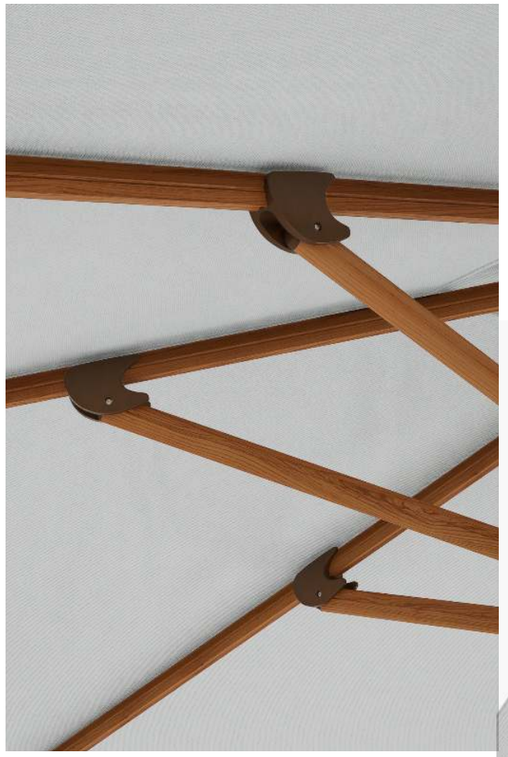

1. Patented Independent Bracket Hub System

Tuuci's patented hub system features stainless steel, resin and anodized aluminum components that are modular, corrosion proof and self-lubricating. This strength and technology guarantee your parasols will last among the harshest elements and conditions.

2. Telescoping Mast & EasyDrive Crank Lift

The MAX operates with a heavy-duty gearbox and self-lubricating lead screw mechanism for smooth and easy opening and closing with the external hand crank. The telescoping mast feature allows the parasol to gracefully deploy while lifting up to reduce interference with furniture.

3. Reinforced Strut Joint Connector

The Ocean Master MAX ribs are expertly engineered with advanced resin connectors that are both self-lubricating and completely resistant to corrosion. This innovative design minimizes friction, ensuring seamless operation while preventing wear over time. By eliminating the risk of rust or degradation from exposure to salt air and moisture, these high-performance components provide unmatched flexibility and durability.

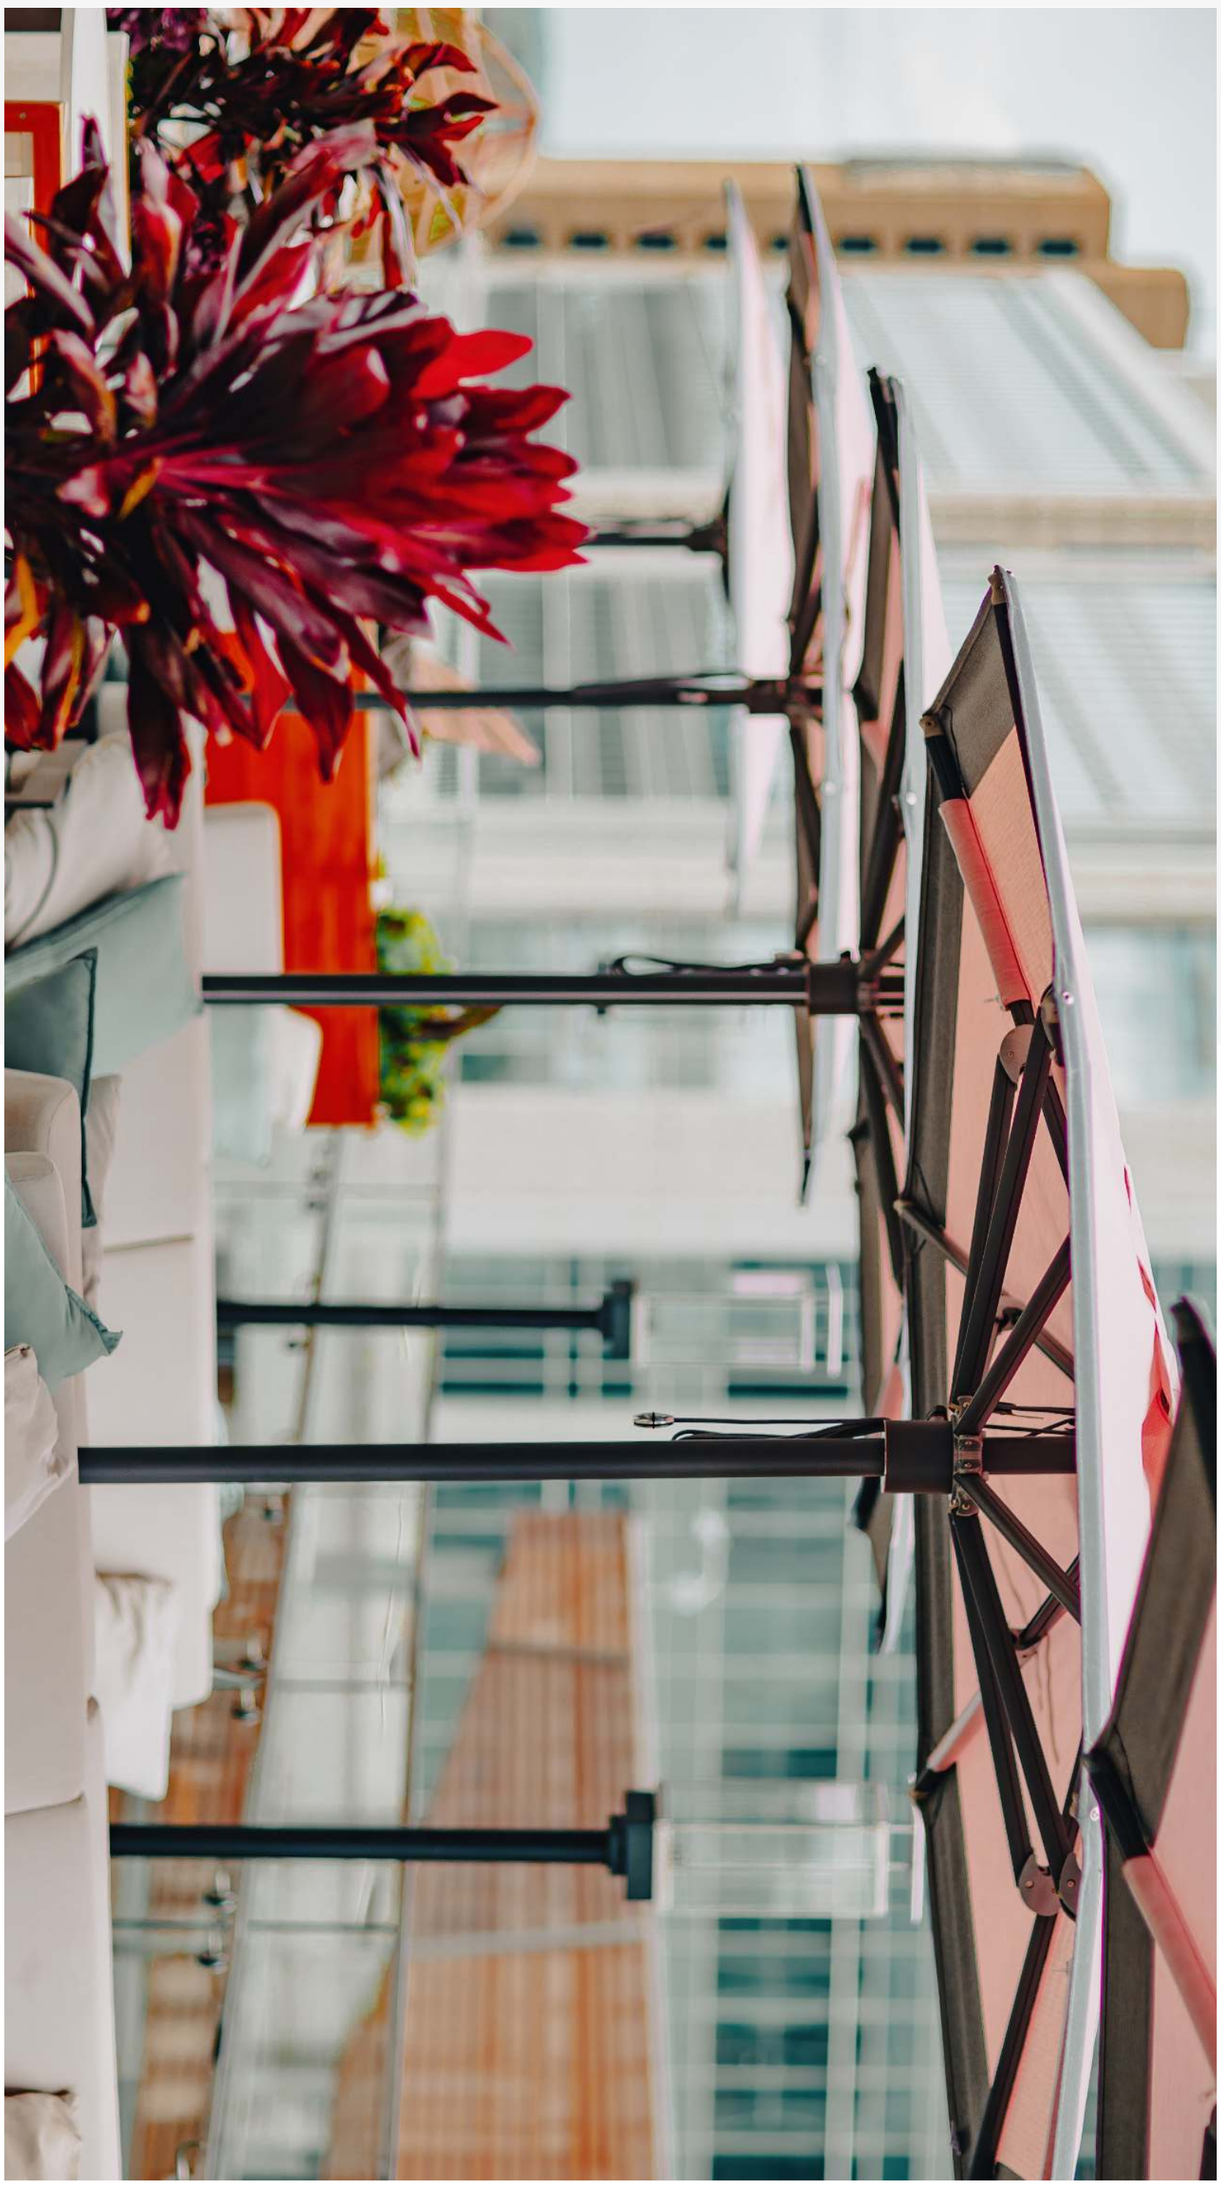

4. Ballistic Reinforced Screw Pocket Construction

Engineered for ultimate durability, our Ballistic Reinforced Screw Pocket Construction ensures a secure, long-lasting hold. Designed to withstand high tension and demanding conditions, this precision reinforcement enhances structural integrity, providing unwavering strength and reliability.

Ocean Master MAX Voilare Center Post

Features

Tuuci's Ocean Master MAX Voilare parasol features sixteen gracefully arched ribs and a flowing sea scallop valance, uniting sculptural beauty with enduring strength and refined coastal elegance.

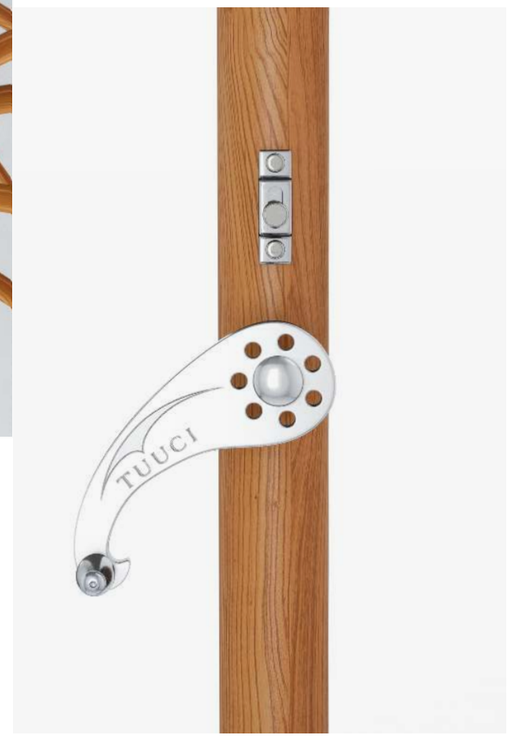

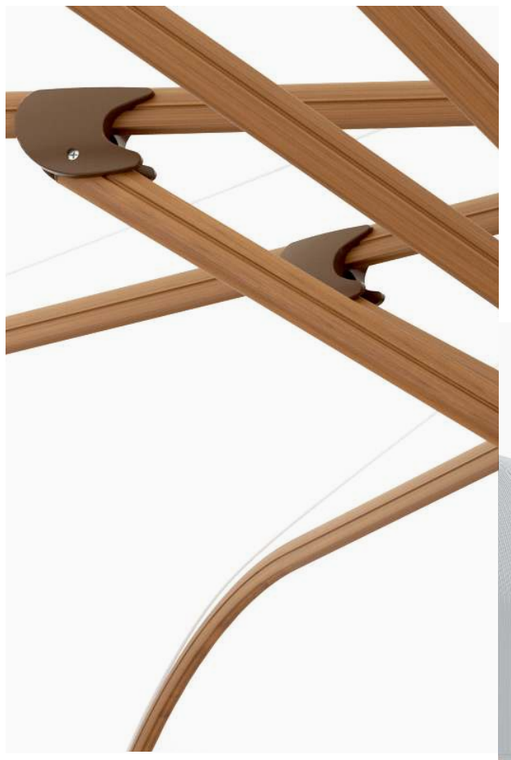

1. Patented Independent Bracket Signature Hub System

Tuuci's double signature hub system features stainless steel, resin and anodized aluminum components that are modular, corrosion proof and self-lubricating. This strength and technology guarantee your parasols will last among the harshest elements and conditions.

2. Telescoping Mast & EasyDrive Crank Lift

The Ocean Master MAX Voilare operates with a heavy-duty gearbox and self-lubricating lead screw mechanism for smooth and easy opening and closing with the external hand crank. The telescoping mast feature allows the parasol to gracefully deploy while lifting up to reduce interference with furniture.

3. Support Where You Need It

The 16 flowing V-MAX™ struts & engineered thermoplastic connector of the Ocean Master MAX Voilare effectively distribute stress for added strength and provide corrosion-resistant durability.

4. Ballistic Reinforced Screw Pocket Construction

Engineered for ultimate durability, our Ballistic Reinforced Screw Pocket Construction ensures a secure, long-lasting hold. Designed to withstand high tension and demanding conditions, this precision reinforcement enhances structural integrity, providing unwavering strength and reliability.

OCEAN MASTER MAX

F-1

The MAX F-1 stands as Tuuci®'s most wind-resistant and durable parasol, engineered for uncompromising strength in the face of nature's fiercest elements. Designed with high-tension stainless steel reinforcement cables, Armor-Wall™ Aluminum Construction, and precision-tensioned stainless steel pocket construction, it withstands wind gusts of up to 45 MPH with unwavering stability.

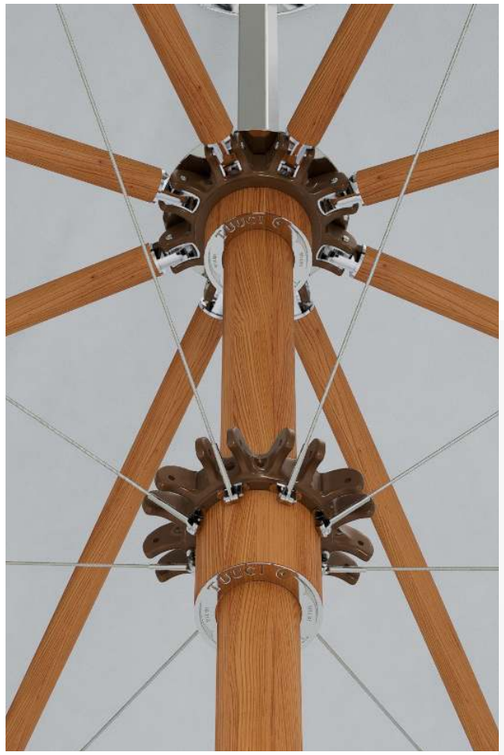

Anchored securely into the ground with reinforced concrete and steel mounts, the MAX F-1 is a testament to resilience, offering enduring protection and performance in even the most extreme conditions.

Square

18.0′ / 5.50m

Features

Engineered for extreme conditions, the MAX F-1 is built to perform where others fall short. With high-tension stainless steel cables, robust Armor-Wall™ aluminum construction, and reinforced canopy pockets, every detail is designed for strength and endurance. Ground-mounted with heavy-duty steel anchors set in reinforced concrete, it stands firm against winds up to 45 MPH, delivering steadfast protection in even the harshest climates.

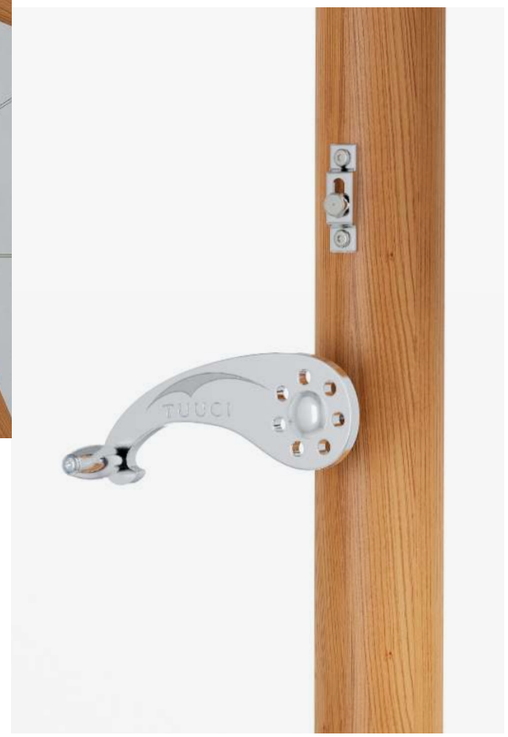

1. High Performance Technology Signature Hub Design

The MAX F-1 is Tuuci's most robust and wind-resistant parasol, engineered with a telescoping mast, high-tension stainless steel reinforcement cables, and ultra-durable Armor-Wall™ aluminum construction for unmatched strength and stability.

2. Telescoping Mast & EasyDrive Crank Lift

The MAX F-1 operates with a heavy-duty gearbox and self-lubricating lead screw mechanism for smooth and easy opening and closing with the external hand crank. The telescoping mast feature allows the parasol to gracefully deploy while lifting up to reduce interference with furniture.

3. Reinforced High Tension Strut

At the core of the MAX's F-1 strength are high-tension stainless steel reinforcement cables, engineered to withstand extreme wind forces while maintaining structural integrity. Combined with Tuuci's Armor-Wall™ aluminum and precision-crafted components, this parasol delivers unmatched durability and stability in demanding environments.

4. Ballistic Reinforced Stainless Steal Pocket Pocket

Tuuci's MAX F-1 canopies feature reinforced aluminum pocket construction, strengthened with stainless steel supports and reinforced stitching at the upper corners—delivering superior durability and long-term performance in demanding environments.

OCEAN MASTER MAX

BOLERO

The Ocean Master MAX Bolero is a graceful fusion of Mediterranean charm and sculptural sophistication. Its distinctive domed canopy and cascading struts evoke the effortless elegance of coastal villas, while refined design details, such as the gently scalloped valance and flowing structural lines, create a silhouette that feels both classic and contemporary. More than just a parasol, the Bolero is an architectural statement, ideal for settings that seek to elevate shade into an artful expression of style and ambiance.

Round

9.0' / 2.7m
12.0' / 3.7m

Features

Blending refined craftsmanship with purposeful engineering, the Ocean Master MAX Bolero offers strength, ease, and sculptural beauty in every detail.

1. The Art of the Dome

The Bolero's domed canopy brings sculptural style and spacious comfort to any outdoor setting. Its curved ribs create a smooth, airy shape that invites relaxation.

2. Engineered for Ease, Crafted for Beauty

Tuuci®'s independent bracket double signature hub design features stainless steel, resin and anodized aluminum components that are modular, corrosion proof and self-lubricating. The EasyDrive Crank Lift system allows for smooth, easy opening and closing operation.

3. Support Where You Need It

The flowing 1" ribs of the Ocean Master MAX Bolero effectively distribute stress for added strength and design integrity. Engineered thermoplastic connector pieces provide corrosion-resistant durability.

4. Inspired Details

Reinforced aluminum endcaps and stainless steel screw pocket connectors add strength and artisanal details.

Ocean Master MAX Ombré Blossom Center Post

Features

The Ombré Blossom Signature blends delicate, hand-tufted blossoms with graceful scalloped accents and enduring materials to create a parasol that feels as beautiful as it performs.

1. Hand-Tufted Outdoor Blossoms

Hundreds of outdoor-rated, hand-tufted blossoms bring softness, texture, and a sense of movement—turning the canopy into a blooming focal point.

2. Scalloped Double Sided Canopy

The double canopy reveals contrasting scalloped layers and gleaming trillion strut ends, creating a distinctive expression of Tuuci's design precision.

3. Scalloped Accent Cap

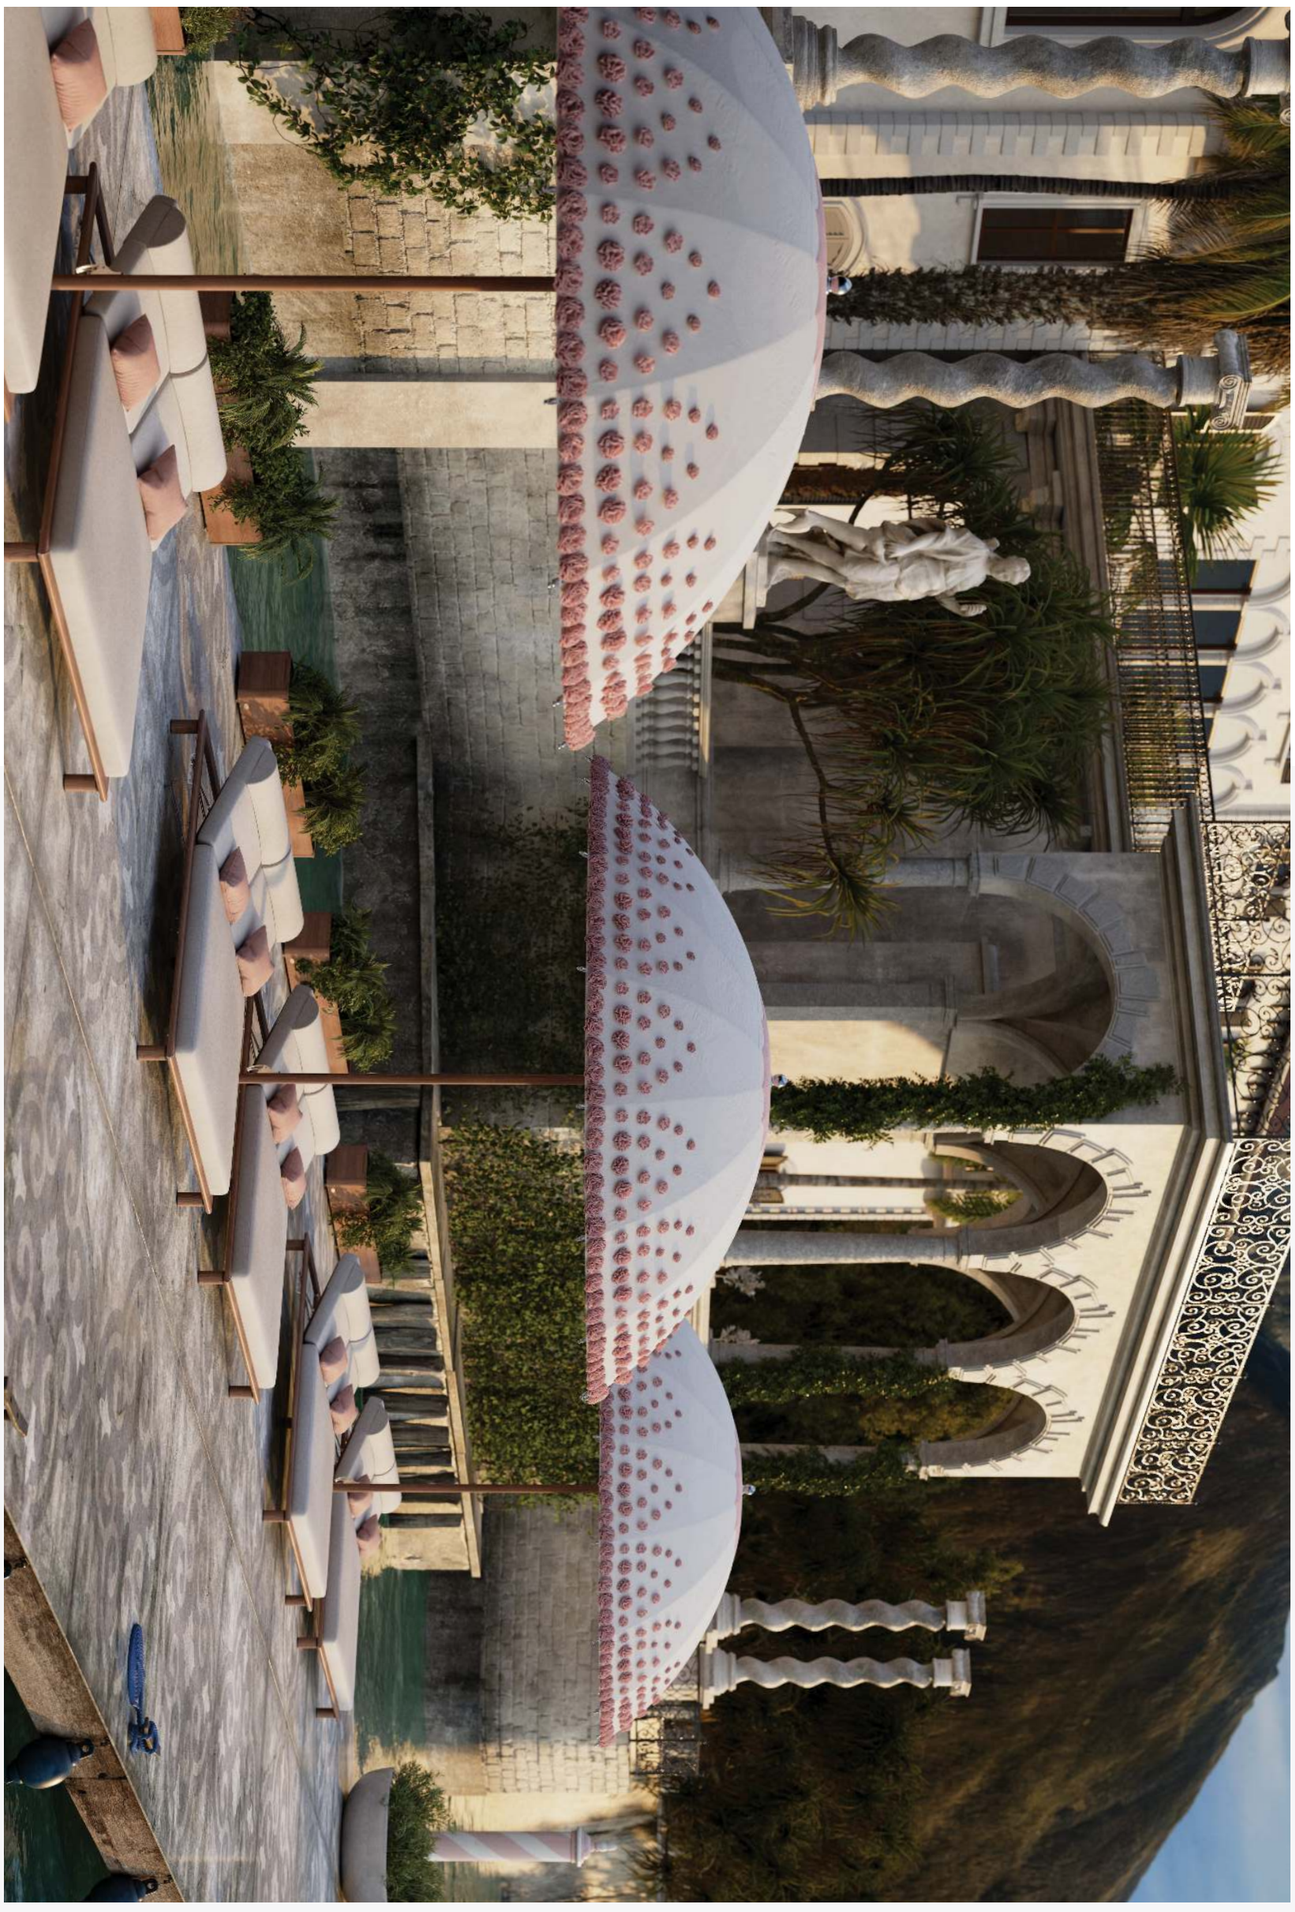

Exterior and interior accent caps combined with scalloped double sided canopy provide symmetry and style.

4. High Performance Materials

Standard on the Ombre Blossom Signature, Tuuci's AlumaTEAK™ pairs the warm look of wood with the strength of marine grade aluminum.

OCEAN MASTER MAX

NAUTICAL TEAK

Inspired by the timeless elegance of both classic and modern sailing architecture, this innovative design redefines the standard for teak parasols.

At its core, a uniquely reinforced mast features an integrated aluminum spine, enhancing structural strength while allowing for the seamless incorporation of an internal telescoping crank lift system—a first in teak parasol craftsmanship. This advanced mechanism ensures effortless opening and closing, while the telescoping design enables a graceful, unobstructed closure over the furniture below, marrying innovation with refined functionality.

Features

At its heart, it features a uniquely reinforced mast, meticulously crafted with an integrated aluminum spine. This design not only enhances structural resilience but also enables the seamless incorporation of an internal telescoping crank lift system—an innovation that redefines teak parasol. By blending cutting-edge engineering with timeless materials, it achieves an unparalleled balance of strength, functionality, and aesthetic sophistication.

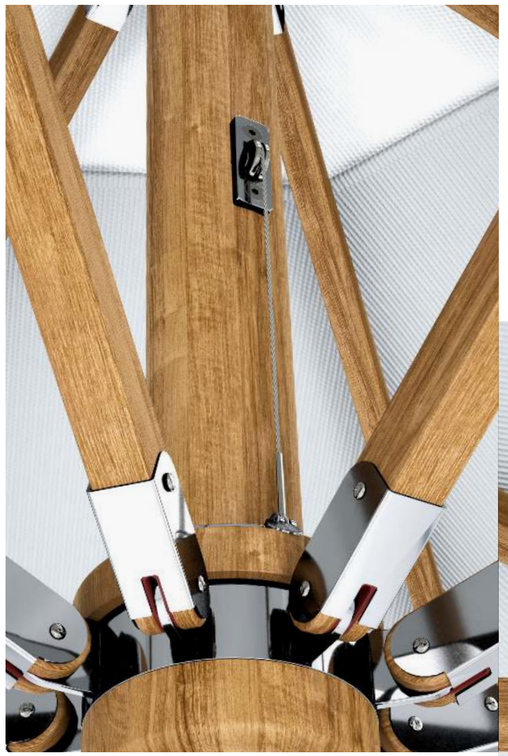

1. Profound Strength & Beauty

Responsibly harvested teak of the highest grade will gracefully develop a gray patina over the long life of the product. Expertly cured, the teak sourced for each parasol has the necessary natural oils locked in to protect from dry rot and splintering. The natural teak used throughout the hubs, ribs and struts marry with polished metal elements adding elegance and a nod to our marine roots.

2. Telescoping Mast

The Aluma-CORE® mast also enables our proprietary gear system and telescoping mast, which allows the parasol to gracefully deploy without interfering with the furniture below.

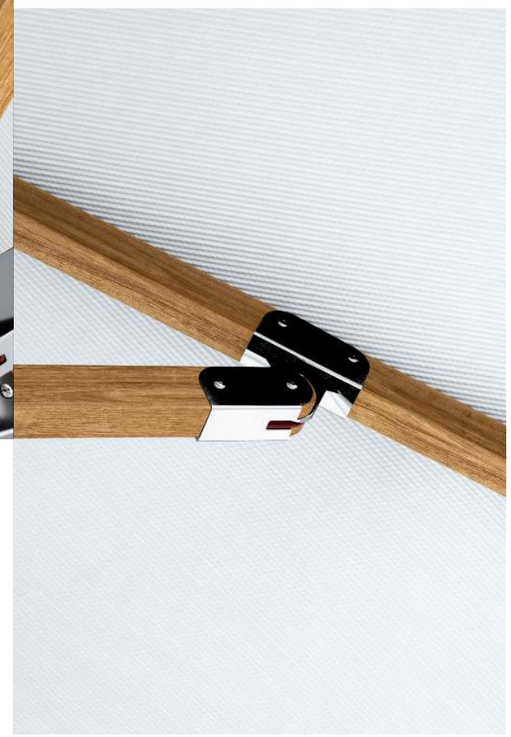

3. Inspired Details

The Aluma-CORE mast enables our proprietary gear system and telescoping mast, which allows the parasol to gracefully deploy without interfering with the furniture below. This innovative core is reflected in external chassis reinforcements clad in polished yachting grade 316 stainless steel alloy.

4. Support Where You Need It

Inspired by our marine roots, we utilize marine grade 316 stainless steel reinforcements and joinery to optimize strength while highlighting the authentic beauty of natural teak hardwood.

CUPOLA

CANTILEVER

A fresh expression of the MAX platform, the Ocean Master MAX Cantilever Cupola stands apart with its raised vent, two-tier canopy and relaxed, sculptural profile. Designed to release heat and encourage airflow, it's framed by the signature Sea Scallop valance for subtle distinction. The side-post design clears the space below, creating an open, effortless environment that feels both intentional and easy.

SHADE POD

The Ocean Master MAX Shade Pod pairs engineered performance with a striking architectural silhouette. Available with single, duo, trio, or quad canopies mounted on a single mast, the Shade Pod expands shade coverage while maintaining an open footprint below. A robust 5.25-inch mast supports canopies up to 12 feet in size, while the MAX EasyDrive Crank opens and closes all canopies simultaneously. Built around Tuuci's patented Signature Hub, reinforced struts, and marine-grade components, the Shade Pod is engineered to deliver durable, all-weather performance.

20′ x 20′	/	6.0 x 6.0
24′ x 24′	/	7.3 x 7.3

Features

The Ocean Master MAX Shade Pod Cantilever brings expansive architectural shade to a single, streamlined mast. Its modular design supports one to four canopies, effortlessly deployed with the EasyDrive Crank Lift, while a robust mast and 1.5-inch ribs deliver strength at scale. Finished in Silver Sand powder coat, the system features a double scissor assembly standard on 12-foot models and available as an upgrade on additional sizes—creating an elegant, open footprint engineered for lasting performance.

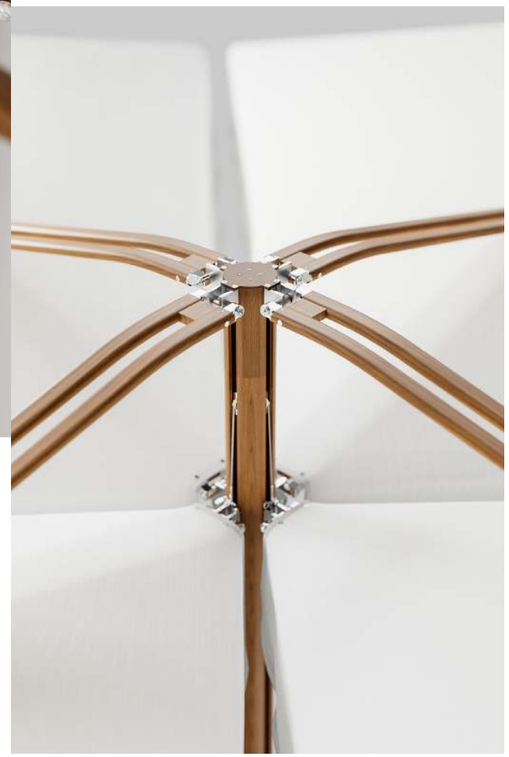

1. Signature Hub

The Ocean Master MAX Shade Pod runs on an independent bracket Signature Hub system, so each canopy operates on its own without transferring load to the others. A robust 5.25-inch mast carries the diamond-shaped canopies, and V-MAX reinforced struts add rigidity where the frame needs it most.

2. Support Where You Need It

The ribs of the Ocean Master MAX Shade Pod use Tuuci's 1.5″ diameter profile with a reinforced design that supports the massive canopies and defends against wind. Every detail was considered to make a longer-lasting, intricate frame.

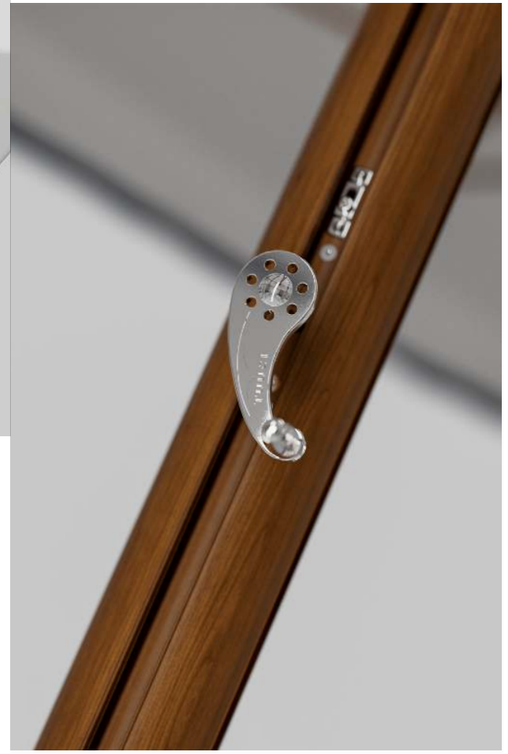

3. Effortless Shade with Auto-Lift Precision

Every Tuuci shade structure is engineered with marine grade aluminum, solution-dyed acrylic canopy fabric, and corrosion-resistant hardware tested in high-UV, high-humidity, and high-wind coastal conditions. The result is a product that performs without seasonal retreatment, protective storage, or ongoing maintenance.

4. High Impact. Low Maintenance.

The MAX EasyDrive Crank lift opens and closes every canopy at once, so a single, dual, triple, or quad configuration goes from closed to full shade in one motion.

ft.	/	m.	sq. ft.
8.0′′	/	2.45m	(256 sq. ft.)
10.0′	/	3.00m	(400 sq. ft.)

Features

Engineered for versatility, the Ocean Master M1 Shade Pod provides broad coverage with up to four individual canopies extending from a single mast. Each canopy can be independently opened in multiple directions using user-friendly auto-lift pistons and secure locking handles. Built with marine grade materials and a modular structure, this system is designed for durability, easy maintenance, and long-term performance.

1. Enduring Strength and Durability

The Ocean Master M1 Shade Pod ribs are made from marine grade aluminum that act as reinforcement, effectively distributing stress and guaranteeing added strength.

2. Independent Canopies, Unified Coverage

The M1 Shade Pod's four individual canopies operate independently, allowing for customized shade coverage in multiple directions. Whether used to cover separate seating areas or create a unified shaded zone, each canopy functions on its own auto-lift system for effortless control. This flexibility makes it ideal for dynamic outdoor spaces requiring adaptable sun protection.

3. Effortless Shade with Auto-Lift Precision

The integrated Auto-Lift System ensures smooth, effortless operation of each canopy with minimal effort. Engineered for ease and reliability, it allows users to deploy or retract shade with precision—no cranks or complex mechanisms required. This user-friendly functionality enhances both everyday use and long-term performance.

4. Built to Endure

Crafted with marine grade materials, the M1 Shade Pod is built to endure harsh outdoor environments. Corrosion-resistant components and premium finishes ensure long-lasting strength and beauty, even in coastal or high-exposure settings. Every detail is engineered for durability, performance, and peace of mind.

SHADE SCULPTURE

STINGRAY

SCULPTURAL SHADE, INSPIRED BY NATURE.

The Stingray redefines shade with its expansive, wing-like form, merging organic elegance with cutting-edge marine grade materials. A true masterpiece of design and durability, it rotates 360 degrees around its vertical axis, effortlessly positioning shade throughout the day.

From its intricately laced tensile shade skin to the polished, wrought aluminum Armor-Wall mast, every detail is meticulously crafted for enduring beauty and performance. A statement of luxury, the MAX Stingray transforms any outdoor space into a haven of refined comfort.

Rectangle

ft.	/	m.

9.0′ x 130′	/	2.70m x 4.00m

Ocean Master MAX Stingray Shade Sculpture

Features

Ocean Master MAX Stingray Shade Sculpture with its sweeping shade and sculptural form, the Stingray stands apart. Inspired by nature and crafted from marine grade materials, it offers both elegance and durability. A 360° rotating canopy ensures optimal shade at any hour, while details like the tensile shade skin and polished Armor-Wall mast reflect its refined engineering and long-lasting performance.

1. Marine grade Materials

Crafted with premium marine grade components, the Stingray is designed to resist corrosion and endure the elements. From coastal climates to intense sun exposure, its structure remains strong, stable, and stunning over time.

2. 360° Rotation

The Stingray's canopy rotates a full 360 degrees around its vertical axis, allowing you to effortlessly follow the sun and maintain optimal shade throughout the day. This fluid movement brings both function and beauty to any outdoor space.

3. Tensile Shade Skin

Its intricately laced tensile canopy not only creates a dynamic visual statement but also delivers lasting strength and flexibility. The unique stitching enhances the sail-like form while ensuring durability in changing weather conditions.

4. Armor-Wall Mast

At the core of the Stingray is a sculptural Armor-Wall aluminum mast—polished, robust, and engineered for longevity. This structural centerpiece blends refined aesthetics with unwavering support.

BAY MASTER M1

MARITIME HARDWOOD

As part of the Essential Collection, Tuuci®'s line of elegant shade parasols, where old-world craftsmanship is perfectly matched with modern corrosion-proof materials, the Bay Master M1 Maritime Hardwood is consistently a top parasol choice for luxury resorts throughout the world and for good reason; it's able to withstand tough, windy conditions in tropical climates.

Built To Last

The Bay Master M1 Maritime Hardwood center post can withstand harsh weather conditions and is an optimal material for design. The hardwood is both dense and strong. These qualities protect the wood from the inside out – preventing dry rot and warping and will weather the years.

Breathe Not Break

Bay Master M1 Maritime Hardwood ribs feature long-grain hardwood strut system that effectively distributes stress and allows for the wood to breathe instead of breaking in gusty conditions.

Canopy Construction

Tuuci's canopies each have reinforced pocket construction, utilizing ballistic fabric to make them significantly stronger to resist tearing or damage if the parasol hits the ground.

SWIM UNDER

CANTILEVER

The Bay Master M1 Swim Under Cantilever parasol draws inspiration from the wind-swept beauty of the Baja Peninsula's ocean and desert landscapes. Featuring a shorter mast, it is designed for seamless deployment directly over pools or patios, with in-ground mounts integrated into the base for enhanced stability. The parasol is equipped with an auto-lift system on the rear cantilever, ensuring effortless opening from the poolside with ease and elegance.

Shorter Mast for Poolside Placement

Designed with a shorter mast, the Bay Master Swim Under Cantilever fits effortlessly over pools or patios, offering ample shade without obstructing views or movement.

Rear Auto-Lift System

An integrated auto-lift mechanism on the rear cantilever allows for smooth, effortless opening from the poolside, combining convenience with refined functionality.

Superior Strength

The Swim Under features ribs reinforced with flexible fiberglass rods, engineered to bend under stress and return to their original shape. This resilience ensures lasting performance in unpredictable environments.

OUR PROMISE

Engineered to perform, built to last

Built to thrive in the harshest outdoor conditions, Tuuci products are crafted with marine grade materials that balance enduring strength with refined aesthetics. Every element is thoughtfully designed, engineered for long-term serviceability, and backed by industry-leading warranties. This sustainable approach extends the life of each piece, reduces environmental impact, and protects your design investment for years to come.

Craftsmanship with purpose

Tuuci products are born from a tradition of hands-on craftsmanship, where every curve, joint, and finish is carefully considered. Our artisans blend marine grade engineering with refined detailing to create pieces that are both resilient and artfully made. This attention to detail ensures every piece feels as intentional as the spaces it inhabits.

Trusted design for every environment

From luxury resorts and private residences to quick-service dining and high-traffic commercial spaces, Tuuci products elevate outdoor environments across every market segment. Our portfolio of parasols, pergolas, cabanas, and furnishings is celebrated for award-winning design and lasting performance, trusted by professionals who demand both visual impact and uncompromising quality. With premium marine grade materials, proprietary Aluma-TEAK finishes, and a range of customizable enhancements, Tuuci delivers refined design at every scale.

Tools that simplify and Inspire

From early concept to final installation, Tuuci provides a suite of resources that streamlines your workflow and brings your vision to life, faster. Whether you're exploring finishes through physical samples, visualizing products with our interactive Design Studio, or pulling spec sheets and CAD assets, our tools are built to support the way designers work. The result: less guesswork, more confidence, and more time to focus on what matters, great design.

Born in Miami, Living Worldwide

Tuuci products are imagined, engineered, and manufactured in Miami, allowing complete control over quality, customization, and innovation. This vertically integrated approach ensures design consistency, exceptional craftsmanship, shorter lead times, and more sustainable production practices. The result is thoughtfully made shade and furnishings that meet the high standards of today's design professionals, no matter where in the world they're specified.

Warranty

At Tuuci, we craft our shade structures using only the finest marine grade materials, ensuring exceptional durability and performance in any environment. Each piece undergoes rigorous testing, far exceeding standard use recommendations, to guarantee unwavering stability and years of worry-free enjoyment. Our meticulous quality control procedures, upheld by dedicated artisans, ensure every product is free from defects and meets our exacting standards. Our commitment is to create shade platforms that surpass expectations, offering an unparalleled experience of comfort and elegance. The limited warranty detailed below covers manufacturing defects exclusively.

For detailed information on our warranty coverage, please visit tuuci.com/warranty.

CARE

Our Commitment to Sustainability and our Community

Our mission in shade design connects a passion for sustainable living with the joy of life outdoors. For nearly three decades, we have been guided by respect for the natural environment and a dedication to our communities. These principles remain at the heart of everything we do, and we continue to push ourselves to make a meaningful impact.

TUUCI® Cares

Product Durability

Our products are engineered for a lifetime of serviceability with replaceable parts and marine grade components, reducing waste and conserving resources. By designing with longevity in mind, we help keep products out of landfills and lower the environmental impact over time.

Responsible Operations

The same high standards that define our products shape the way we operate. We actively seek new ways to minimize material waste while maintaining premium quality. From fabric recycling initiatives to responsible sourcing practices, we strive to reduce our ecological footprint and promote a culture of sustainability.

Community

We believe good deeds begin at home — wherever that home may be. Through philanthropic and volunteer efforts, Tuuci supports local organizations that protect the environment, expand access to education, and provide shelter for families in need. Our goal is to be engaged and generous contributors to the communities where we live and work.

INSIDE BACK COVER

BACK LINER

Nature is not just a backdrop. It is the inspiration.
The rhythm of the outdoors restores something within, a reminder that life inside may be good, but life outside is a life well lived.

Let’s let the soul drift and the heart linger.
Let’s stay in the moment.
